

North Carolina's updated phases include:

- Current Phase - Phase 1a: Health care workers fighting COVID-19 & Long-Term Care staff and residents.
- Phase 1b (to begin in early January): Adults 75 years or older and frontline essential workers
- Phase 2: Adults at high risk for exposure and at increased risk of severe illness.
- Phase 3: Students
- Phase 4: Everyone who wants a safe and effective COVID-19 vaccination.

Because currently there is not enough vaccine for everyone to be vaccinated at the same time, NCDHHS will open the next phase of vaccinations (1b) in groups, starting only with persons above the age of 75 in order to best manage vaccine dose availability. To see all the groups for Phases 1b and Phase 2 please review this [Infographic of Vaccine Phases](#).

All vaccine providers are expected to ensure that vaccines are equitably administered within each group. NCDHHS has a specific focus on building trust with historically marginalized populations. Longstanding and continuing racial and ethnic injustices in our health care system contribute to lack of trust in vaccines. The Department is partnering with trusted leaders and organizations to provide accurate information about the vaccine.
